Detailed Description

Claims

Detailed Description

... IP portfolio for management decisions.

In another aspect, the invention includes an index of market **value** of  
**intellectual property** belonging to a technology classification. The  
index for each classification uses enterprise values of publicly...

...is useful. for generating a relative measure of financial risk (P).

Finally, a Quantitative Asset **Database** for storing quantitative  
information about attributes of technology described by an IP asset is  
also...

...units is included as part of the process of storing information in the  
Quantitative Asset **Database**.

1 5

BRIEF DESCRIPTION OF THE DRAWINGS

Fig. 1 is a block diagram of a...theory with data from

1 0 publicly-traded, technology-fich companies to compute reasonable  
market **values** for **intellectual property** that aid buyers and sellers  
to converge on a fair market value. The valuation model...

...distribution function used in statistical theory.

In the TRRU valuation model, an adaptation of the **Black Scholes**  
formula is applied to compute the **value** of **intellectual property**  
using measurable features of the patent or **patents** on offer, or of  
**values** of comparable technologies, in place of the values used for call  
**options** on stock. In place of the strike price, X, the amount of money  
that must...

...asset being valued. Enterprise value, EV, is the market capitalization, defined as the number of **shares** outstanding times the share price, minus the book value, defined as the total assets less...the public has no assurance that the developer will do its best to develop the **patent**, and the eventual **value** of the **patent** call option is related to the patent's development.

Put Options

A third-party nay...

#### Claim

... publicly traded securities comprises enterprise values of companies in a same technology classification as the **intellectual property** asset, wherein the enterprise **values** are updated periodically based on stock prices, **shares** outstanding, and book value of the companies, and wherein the stock prices are transferred to the **database** from an external source.

4 The computer system of claim 1, wherein. computing a valuation...

...publicly traded  
securities stored in the database. '

11 A computer system for detennining a suggested **price** for transfer of  
1 5 **intellectual property** rights between buyers and sellers of  
intellectual property assets, wherein the rights comprise licenses and...

...of an intellectual property asset and about  
licensing conditions offered by the seller in a **database**; and  
generating a suggested asking **price** wherein a **value** of the  
**intellectual property** rights is modified according to the licensing  
conditions.

12 The computer system of claim. 1...

...price, and a balance between inunediate and future payments. . A method  
for determining a suggested **price** for transfer of **intellectual  
property** rights between buyers and sellers of intellectual property  
assets, wherein the rights comprise licenses and...

...of an intellectual property asset and about  
licensing conditions offered by the seller in a **database**; and  
generating a suggested asking **price** wllerein a **value** of the  
**intellectual property** 1 5 rights is modified according to the  
licensing conditions.

15 A computer-readable storage medium operatively coupled to a computer  
system for determining a suggested **price** for transfer of **intellectual  
property** rights between buyers and sellers of intellectual property  
assets, wherein. the rights comprise licenses and by the seller in a  
**database**; and  
generating a suggested asking **price** wherein a **value** of the  
**intellectual property** rig,hts is modified aecording to the licensing  
conditions.

16 A computer system for providing an index for market **value** of  
**intellectual property** assets belonging to a technology  
classification, the computer  
system. comprising:  
at least one server computer...

...the computer program further comprises computer instructions for:  
storing information about companies having publicly traded **securities**  
in a **database**, wherein the companies operate predominantly within the  
technology  
classification; and  
computing an average of the enterprise value of the companies using the  
information about the companies stored in the **database**.

17 The computer system of claim 16 wherein the information about companies having publicly traded...

...periodically based on updated stock prices.

19 A method for providing an index for market value of intellectual property assets belonging to a technology classification using a computer system comprising at least one server...

...server computer via a network, the method comprising:  
storing information about companies having publicly traded securities in a database, wherein the companies operate predominantly within the technology classification; and  
computing an average of the enterprise value of the companies using the information about the companies stored in the database.

20 A computer-readable storage medium operatively coupled to a computer system for providing an...

Detailed Description

Detailed Description

... to make with respect to the possible future market moves and the complexity of the portfolio. Such methods are described generally in RiskMetriCSTm Technical Document, Morgan O Guarantee Trust Company Global Research (4th ed. 1996), and Philli e Jorion, Value at Risk.

#### IP

The New Benchmark for Controlling Derivatives Risk (Irwin Professional Publishing 1997). The most generally-applicable method...

...particular, some simulation may be unavoidable to get an accurate picture of risk when a portfolio contains substantial positions in instruments with optionality, such as 5 options, convertible bonds, mortgages and loans with embedded options. However, given the

complexity and computational requirements of known simulation methods, users must trade accuracy for price, time and ease of implementation. Moreover, full simulation of very large and complex **portfolios**, such as those encountered in many financial institutions today, may not be achievable in a...

...with top-of-the-line computers. For example, a VaR estimate of a large, complex **portfolio** over several thousand Monte Carlo scenarios could easily take several hours, if not days, for...

...of-the-line work station. Indeed, even the simple task of loading and storing large **portfolios** can be onerous and time consuming.

In an effort to address the practical problems associated...

...SPECIFICATION another member of the organisation, details of the  
download are entered into the search access **database** to ascribe an  
organisation **IP value** to the search acquired by that download.  
This will successfully track the use by members...

...another member of the organisation, details of the download are entered  
into the search access **database** and the report access **database** to  
ascribe an organisation **IP value** to the search and the report.  
By noting in both the search access database and...

...data based on an agreed valuation unit and the rating is entered in the  
relevant **database** to provide the organisation **IP value** of that  
download. The value of this is that a check is kept on how...

...onto the system:-

the member ascribes an organisation IP value to the data;  
the organisation **IP value** is entered into the relevant access  
**database** ; and

each time a data is downloaded, the organisation **IP value** is  
entered into the access **database** .

This allows the member inputting the data to prepare their own value of  
what they...

...ascribes a value to the data; and

the value is entered into the relevant access **database** as the  
organisation **IP value** .

Alternatively, on entering a search or report in the system, the steps  
may be performed...

...rejects a bid; and

on accepting a bid, the bid is entered into the relevant **database** as  
an organisation **IP value** .

When receiving such a bid, the method envisages:-  
the bid being stored until a preset...allocates a value rating to the data;  
the value rating is entered into the access **database** ;  
the value ratings are used to adjust the organisation **IP value** to provide an adjusted organisation IP value.  
Ideally, in the latter method, a record is...

...for each piece of data for the search period is obtained from the relevant access **database** ;  
the aggregate of all the **IP values** is obtained to provide a total organisation IP value.  
Ideally, with this latter method, after...wishes to access a particular search or a particular report, in step 120, the access **database** is consulted and in step 121, the organisation **IP value** , in step 121, is ascertained and in step 122 the data is downloaded. In step...value to the data, which organisation IP value could be entered into the relevant access **database** and each time data is loaded, then that organisation **IP value** is entered into the access **database** .  
It is also envisaged that the organisation **IP value** may be set automatically on a time basis with the organisation IP value varying for ...

...CLAIMS another member of the organisation, details of the download are entered into the search access **database** to ascribe an organisation **IP value** to the search acquired by that download.  
2. A method as claimed in claim 1...

...another member of the organisation, details of the download are entered into the search access **database** and the report access **database** to ascribe an organisation **IP value** to the search and the report.  
3. A method as claimed in claim 1 or...

...data based on an agreed valuation unit and the rating is entered in the relevant **database** to provide the organisation **IP value** of that download.  
4. A method as claimed in any of claims 1 to 3...

...onto the system:-  
the member ascribes an organisation IP value to the data;  
the organisation **IP value** is entered into the relevant access **database** ; and  
each time a data is downloaded, the organisation **IP value** is entered into the access **database** .  
5. A method as claimed in claim 3 or 4, in which the organisation IP...

...ascribes a value to the data; and  
the value is entered into the relevant access **database** as the organisation **IP value** .  
11. A method as claimed in claim 1 or 2, in which, on entering a...

...rejects a bid; and  
on accepting a bid, the bid is entered into the relevant **database** as an organisation **IP value** .
